

HOLDER for LED HEADLIGHT

ready for BMW R1200 / 1250 RT LC 2014+

You can connect to left side connector, under left front dashboard panel you see 3-Pins connector

- earth brown, communication purple wire, + contact red/blue

we connected to + and - and work perfect

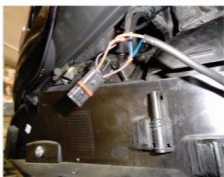

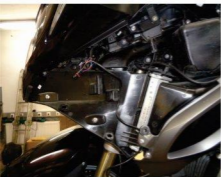

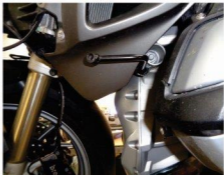

when you will start motorcycle is on, and when you will stop then is off
in some countries must be light in to ON position

You can also add a power off switch

we attached is some fotos for help to installation

regards, Oldtimers TEAM
